Boosting the immune system ñ 2-6 capsules for 40 days twice per year;

Radiation from computer monitors, microwaves, cellular phones, power lines, etc. ñ 2-6 capsules for 40 days twice per year.

HOW TO TAKE

It is best to take E-Toxal before meals with plenty of water twice a day rather than all at once. We recommend to not take E-Toxal in the evening, as it may give you too much energy to sleep.

Children about five to six years old may take 1-2 capsules a day. For younger children, try mixing up to one capsule in their food.

NOTE: Pregnant women, seriously ill people, those allergic to iodine and children should consult their health professional before taking this product. (Some people who are allergic to iodine have taken this product with success at a smaller dosage.)

Detoxification

An incredible breakthrough from...

Russia and Japan

e-toxal

(patented "predigested" **Brown Algae** concentrate)

Predigested Brown Algae has now been proven to balance the thyroid function and to detoxify the body from heavy metals and radiation and...aid in the prevention and treatment of cancer*, call for **Scientific Medical Report!**

As you probably know, **Japan** has the lowest incidence of cancer in the western world and on the island of Okinawa, the cancer death rate is even lower. Okinawans eat large amount of a brown algae raw called Laminaria Japonica.

The cancer-fighting substance in brown algae is called **U-fuoidan** and was shown in laboratory research to cause cancer cells to self-destruct within 72 hours in a process called "**apoptosis**".

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Cancer

In **Russia**, scientists searched the world to stop cancer and radiation sickness among the victims after the nuclear disaster in **Chernobyl**. They found that Laminaria Japonica was effective and developed a patented process to remove the indigestible parts of the algae, substantially concentrating the active ingredients.

Over 40% of e-toxal is alginates, which are the perfect absorbers of dangerous metals such as lead, mercury, cadmium, aluminum, cobalt and radium as well as radioactive elements. These pollutants slowly collect in your body, irritating the body and disrupting the immune system.

Mercury (found in amalgam teeth fillings, fish, and pesticides) is 5000 times more toxic to the body than lead. Mercury stores itself in the brain, liver, kidneys and nerves.

Approximately every third person in the US will contract cancer. E-toxal will help protect you from cancer with cancer-killing U-fuoidan and detoxifying alginates.

Studies have shown that the **Japanese** intake of brown seaweed is responsible for that country's **dramatically lower...**

- **Breast cancer rates.**
- **Less obesity**
- **Heart disease**
- **Respiratory disease**
- **Rheumatism and arthritis**
- **High blood pressure**
- **Thyroid disease**
- **Infectious disease**
- **Constipation**
- **Other gastrointestinal ailments.**

Thyroid Function

Accumulation of toxins from the environment contribute to many diseases. It is suspected that aluminum may contribute to the brain deterioration known as **Alzheimer's disease**.

Worldwide research shows that brown seaweed can...

- **Detoxify the body from metals, lead, mercury and other toxins.**
- **Inhibit growth of tumor cells.**
- **Decongest inflamed lymph nodes.**
- **Lower cholesterol, triglycerides and blood sugar.**
- **Be a cancer preventative substance.**
- **Aid in digestion and elimination.**
- **Increase energy.**
- **Strengthen the immune system.**
- **Strengthen and beautify, hair, nails and skin.**

The powers of seaweed have been drawn upon for thousands of years for their ability to prolong life, prevent disease, and impart beauty and health for happier and longer lives. The human body begins its development in a saline solution in the womb and is nourished and cleansed by blood that has almost the same composition as sea water.

The e-toxal concentrate is made without harmful chemicals and is completely safe to use and non-allergenic.

(Note! Freshwater blue-green algae does not contain detoxifying alginates)
