For many centuries, the miraculous properties of seaweed have been well-known for making people more beautiful and healthy. For example, *Laminaria japonica* has been used in Japan for more than 800 years and the Chinese have exported this unique type of seaweed for more than 500 years. These cultures have known for centuries that seaweed used orally and topologically improves hair structure, hair growth, nails, and skin. Look at the Japanese women with their wonderful skin and slim figures and... much lower rates of breast cancer. Now science know why!

Worldwide research indicates that seaweed extract is similar to human blood plasma. Thus, the vitamins, micro and macro elements, such as zinc, selenium, iron, and iodine so necessary to everyday life, are pumped in to the blood and help to balance the skin cells.

e-toxal is *Laminaria Japonica* Algae Concentrate where the heavy indigestible fibers have been removed in a patented process, leaving the water soluble nutrients to be readily absorbed into the skin. You not only should take e-toxal as a food supplement but also use it for the face and body.
